EVIDENCE BASED PRACTICE

Health and medical research is moving fast and clinicians have to run to keep up. Health library and information services provide the most relevant books, journals, research databases and point of care resources for students starting out in their careers, and for professionals who need to remain in touch with the very latest developments in their fields, to ensure their practice is evidence based.

PATIENT CARE

Clinicians rely on health librarians for quality information to improve the health outcomes of their patients. A national survey of library users in 2012 found that for 83% of respondents library and information services had helped improve health outcomes for patients, and for 76%, the information provided had changed their thinking and improved their diagnosis or treatment plan.

INFORMATION LITERACY

Health librarians are not only skilled in information literacy and critical thinking, they help others develop these skills. Anyone can Google; not everyone knows how to identify the most relevant, timely and credible sources. As information seekers, librarians are fast, efficient and thorough, and they provide training for their clients to improve the information literacy of everyone in the organisation.

DIGITAL EXPERTISE

Health librarians have sound ICT knowledge and skills and are capable and responsible users of new and emerging technologies. Their roles as professionals in health information services are more and more intertwined with roles in information management and information systems and technologies. Working together in teams with other health information professionals, health librarians add value to design, implement, administer and evaluate quality platforms with quality content that deliver successful digital transformation in healthcare organisations.

Services

HNE Health Libraries provide a range of services to assist and support the research, teaching and information needs of all Hunter New England Local Health Districts staff and affiliated health professionals.

The network is made up of seven libraries located in hospitals at Armidale, Belmont, John Hunter, Maitland, Mater, Tamworth, and Taree.

Our mission is to support patient care through the delivery of evidence-based information, high quality

Trusted Answers

Trip medical database, a smart, fast tool to find high quality clinical research evidence.

Searched over 125,000,000 times
Over 70% of clinical questions answered

[Unrivalled content](#)

Millions of articles items indexed & uniquely ranked
Twenty years of learning & fine tuning

Trip Pro is the most advanced version of Trip it has extra content and functionality, including:

- 100,000+ extra systematic reviews
- Medical images and videos
- Links to millions of full-text articles
- Export facility to reference management software
- Advanced search
- Much more ([click here](#) to see the full list)

Available as both personal (\$55 US Dollars per year) and institutional subscriptions.

2. School-based self-management interventions for asthma in children and adolescents: a mixed methods systematic review. (PubMed)

School-based self-**management** interventions for **asthma** in children and adolescents: a mixed methods systematic review. **Asthma** is a common respiratory condition in children that is characterised by symptoms including wheeze, shortness of breath, chest tightness, and cough. Children with **asthma** may be able to **manage** their condition more effectively by improving inhaler technique, and by recognising and responding to symptoms. Schools offer a potentially supportive environment for delivering (...) interventions aimed at improving self-**management** skills among children. The educational ethos aligns with skill and knowledge
